gary bryner s brief readable capstone book features a forward by mark a boyer outlines the major environmental challenges facing the world today applies international relations theory to these challenges covers such key topics as development sustainability and market capitalism offers a social justice perspective to environmental problems and solutions borne of an amalgam of social science fieldwork and a passionate commitment to justice this book brings debates about climate change to a new level compelling readers and researchers to rethink the reasons for reversing global environmental trends the book lays out three inspirations for improving environmental prospects effective markets sustainable development and environmental justice for the most vulnerable it also projects three possible scenarios flowing from the success or failure of these inspirations one bleak one breakthrough and one of status quo gary bryner is not sanguine about humanity s ability to make the right choices but this does not deter him from asking us to think beyond our own generation and our own species in urging environmental action now

the fundamental point of this book is that in the past the world s political economic military and social development took place during a time of relatively stable sea level that time however is now over the world must begin to cope with rising seas this book is a wide ranging

introductory survey it addresses global warming the hydrologic cycle why we should care about the rise of the oceans storm surges and other extreme events the changing seas and their shorelines cities and countries of the atlantic pacific and indian ocean basins the west antarctic ice sheet and the greenland ice sheet case studies on how the netherlands and the u s plan to cope with sea level rise the likely impacts of this rise getting to know the experts on sea level rise and very long term prospects for the world s shorelines

cents and sustainability is a clear sighted response to the 1987 call by dr gro brundtland in our common future to achieve a new era of economic growth that is forceful and at the same time socially and environmentally sustainable the brundtland report argued that not only was it achievable but that it was an urgent imperative in order to achieve a transition to sustainable development while significantly reducing poverty and driving clean and green investment with some still arguing for significantly slowing economic growth in order to reduce pressures on the environment this new book cents and sustainability shows that it is possible to reconcile the need for economic growth and environmental sustainability through a strategy to decouple economic growth from environmental pressures combined with a renewed commitment to achieve significant environmental restoration and poverty reduction beginning with a brief overview of some of the most pressing environmental challenges of our time the book then explains decoupling theory overviews a number of factors that can undermine and even block efforts to decouple in both developed and developing countries and then discusses a number of key considerations to assist the development of national decoupling strategies the book then focuses on presenting evidence to support greater action not just on climate change but also on decoupling economic growth from the loss of biodiversity and the deterioration of natural systems freshwater extraction waste production and air pollution in the lead up to the 2012 united nations earth summit and beyond cents and sustainability will be a crucial guide to inform and assist nations to develop strategies to significantly reduce environmental pressures strengthen their economy create jobs and reduce poverty i commend the team from the natural edge project and their partners for undertaking to develop a response to our common future to mark its 20th anniversary dr gro brundtland sequel to the natural advantage of nations published with the natural edge project
