this book constitutes the refereed proceedings of the international conference on spatial cognition spatial cognition 2006 it covers spatial reasoning human robot interaction visuo spatial reasoning and spatial dynamics spatial concepts human memory mental reasoning and assistance spatial concepts human memory and mental reasoning navigation wayfinding and route instructions as well as linguistic and social issues in spatial knowledge processing

moreover it permits the spatial aspect of the data to participate fully in the optimization process once an appropriate cost model is developed for estimating the cost of spatial as well as relational operators from a different perspective the concept of a spatial relation provides the flexibility of utilizing spatial data structures not only as indexing mechanisms to speed up the query processing but also as containers for organizing and manipulating the full descriptions of spatial objects an algebra that has spatial relations as the basic entities and spatial and relational selects and joins as the basic operators is developed in addition some proofs are given that transformation rules hold for spatial operators as well

first published in 1983 this is a volume in a series on child psychology this book offers a set of theoretical ideas which make up a quite general theory of the mental representation of space which accounts both for much of spatial perception but also much of spatial thought the system is general and economical and can be readily applied to novel problems as we illustrated in regard to piaget s water level problem and koler s letter recognition problem

in this book the authors present the latest research results in the multimedia and semantic web communities bridging the semantic gap this book explains collects and reports on the latest research results that aim at narrowing the so called multimedia semantic gap the large disparity between descriptions of multimedia content that can be computed automatically and the richness and subjectivity of semantics in user queries and human interpretations of audiovisual media addressing the grand challenge posed by the semantic gap requires a multi disciplinary approach computer science computer vision and signal processing cognitive science web science etc and this is reflected in recent research in this area in addition the book targets an interdisciplinary community and in particular the multimedia and the semantic communities finally the authors provide both the fundamental knowledge and the latest state of the art results from both communities with the goal of making the knowledge of one community available to the other key features presents state of the art research results in multimedia semantics multimedia analysis metadata standards and multimedia knowledge representation semantic interaction with multimedia contains real industrial problems exemplified by user case scenarios offers an insight into various standardisation bodies including w3c iptc and iso mpeg contains contributions from academic and industrial communities from europe usa and asia includes an accompanying website containing user cases datasets and software mentioned in the book as well as links to the k space noe and the smart society web sites multimediasemantics com this book will be a valuable reference for academic and industry researchers practitioners in multimedia computational intelligence and computer science fields graduate students project leaders and consultants will also find this book of interest

this 6 volume set Inai 14875 14880 constitutes in conjunction with the 13 volume set Incs 14862 14874 and the 2 volume set Inbi 14881 14882 the refereed proceedings of the 20th international conference on intelligent computing icic 2024 held in tianjin china during august 5 8 2024 the total of 863 regular papers were carefully reviewed and selected from 2189 submissions the intelligent computing annual conference primarily aims to promote research development and application of advanced intelligent computing techniques by providing a vibrant and effective forum across a variety of disciplines this conference has a further aim of increasing the awareness of industry of advanced intelligent computing techniques and the economic benefits that can be gained by implementing them the intelligent computing technology includes a range of techniques such as artificial intelligence pattern recognition evolutionary computing informatics theories and applications computational neuroscience bioscience soft computing human computer interface issues etc
